# GARDENA Irrigation Valve

Translation of the original instructions from German.

Please read these operating instructions carefully and observe the notes given. Use these operating instructions to familiarise yourself with the Irrigation Valve, its correct use and the notes on safety.

For safety reasons, children under 16 as well as persons not familiar with these operating instructions should not use this Irrigation Valve. Persons with reduced physical or mental abilities may use the product only if they are supervised or instructed by a responsible person. Children must be supervised to ensure that they do not play with the product. Never operate the product when you are tired, ill or under the influence of alcohol, drugs or medicine.

→ Please keep these operating instructions in a safe place.

# 1. Where to Use Your GARDENA Irrigation Valve

## *Intended use*

The Irrigation Valves are intended solely for outdoor use for fully automatic control of individual irrigation systems. It is a benefit to arrange a watering system into separate sections in case of varying watering needs for different plant areas or if there is insufficient water available for simultaneous operation of the entire watering system.

The Irrigation Valve is installed upstream in the watering system (e. g. Pop-up Sprinklers; Micro-Drip-System), for example, in the ground.

## *Please note*

Compliance with the enclosed operating instructions provided by GARDENA is a prerequisite for proper use of the Irrigation Valve.

### 9V:

The Irrigation Valve **1251** forms part of an irrigation system in conjunction with the Programming Unit **1242** and the Control Unit **1250**.

### 24V:

The Irrigation Valve **1278** forms part of an irrigation system in conjunction with the Watering Controller **1276**.

The Irrigation Valve must only be used in conjunction with the – 9 V Control Units; Radio Receivers / 24 V Watering Controller – approved by GARDENA.

## 2. Safety Instructions

---

### *Blocking the Irrigation Valve*

→ Please observe the notes on safety in the operating instructions.

**9 V and 24 V products are not interchangeable.**

→ **In the case of dirty water, the GARDENA Central Filter Art. No. 1510 must be installed upstream in the watering system.**

### *Water pressure*

The function of your watering system depends on the available water pressure. Therefore, care should be taken not to overlap watering cycles of the various watering circuits and to ensure that the watering circuits you have planned will be supplied with sufficient water at an adequate pressure.

Please refer to the planning instructions in the special brochure entitled “Watering Systems – Sprinkler System Planning Guide” available from GARDENA.

### 3. Initial Operation

If the Irrigation Valve is installed below ground level, it must be installed in a sturdy and step-proof valve mount ① (valve box) e.g. GARDENA Art. No. 1254/1255/1290/1292.

**Install the valve mount:**

1. Draw up a plan (an example is shown in the figure below).

Additional information is provided in the GARDENA Sprinkler System Planning Guide which is available from your GARDENA dealer.

2. For underground installation, place a layer of coarse gravel ② underneath the valve mount ①.

*This ensures proper drainage of the box.*

### **Installing the Irrigation Valve without a Valve Box:**

3. Install the valve box with the top edge of the box at ground level.

*This avoids damage when mowing the lawn.*

Please refer to the relevant operating instructions for information on how to install the Irrigation Valves in GARDENA Valve Boxes V1 and V3.

The integrated solenoid valve works only correctly with the Irrigation Valve connected in flow direction.

#### **Flow direction**

→ Pay attention to the flow direction (arrows) when installing the Irrigation Valve ③.

→ Seal the screw connections with PTFE sealing tape, **Art. 7219**.

#### **Connecting GARDENA Connecting pipes ⑧ (2700/2701/2704/2705/2718) or other commercially available connecting pipes:**

1. Screw a **GARDENA Connector ⑦ 2763** (1" = 25 mm) / **2769** (5/4" = 32 mm) into the Irrigation Valve ③.
2. Connect the GARDENA connecting pipes ⑧ or other commercially available connecting pipes (25 mm / 32 mm).

**Connect Soil Moisture Sensor  
or Rain Sensor electronic  
(optional):**

In conjunction with the programmed watering time, the moisture level of the soil or the natural precipitation can be taken into account for each Irrigation Valve.

When a sufficient moisture content of the soil is reached, a programme may be interrupted or activation of a programme may be suppressed.

1. Place the Soil Moisture Sensor ⑨ in the area to be irrigated – or – the Rain Sensor electronic (if necessary with an extension cable) **outside** of the area to be irrigated.

2. **9V:** Plug the connector ⑩ into the sensor socket of the Control Unit.

**24V:** Insert plug ⑩ in the sensor connection of the Watering Control System **Art. 1276** (s. Operating Instructions **Art. 1276**).

**Conventional installation :**

If using **Art. 2750 / 2751 / 2752 / 2753 / 2755** the points marked with an arrow must be sealed with sealing tape (e.g. **Art. No. 7219**).

## 4. Operation

### Adjusting valve control:

### Fully Automatic Control:

→ Set selection lever ⑪ to “**AUTO/OFF**”.

*Programme-controlled water flow to the watering system according to the programming in the Control Unit / Radio Receiver.*

An automatically opened valve cannot be closed manually.

### Manual Control:

→ Set selection lever ⑪ to “**ON**”.

*Permanent water flow, independent of the programming.*

## 5. Trouble-Shooting

Fault	Possible Causes	Remedy
Solenoid valve does not open, no water flow	No water supply.	→ Turn on water supply.
	Control Unit / Radio Receiver / Watering Controller not connected correctly to Irrigation Valve.	→ Connect Control Unit / Radio Receiver / Watering Controller correctly to Irrigation Valve.

Fault	Possible Causes	Remedy
Solenoid valve does not close, continuous water flow	Solenoid valve installed opposite to flow direction.	→ Turn solenoid valve (observe the flow direction).
	Selection lever ⑪ set to “ON”.	→ Set selection lever ⑪ to “AUTO/OFF”.

In the event of other faults please contact **GARDENA Service**.  
Repairs should only be carried out by **GARDENA service centres or dealers** authorised by GARDENA.

## 6. Protection against Frost

### *Winter storage:*

GARDENA Irrigation Valves are intended for outdoor use and are only frost-proof to a limited extent. The only way to protect your Irrigation Valves completely is to remove the valves before the frosty season begins. Alternatively, you can drain the pipeline system upstream and downstream of the Irrigation Valve.

### *Emptying the pipeline system UPSTREAM of the valve:*

1. Turn off the tap and disconnect the hose between the tap and the **GARDENA Water Connection Point Art. No. 2722 / Art. No. 2795**.

*This allows the air to flow freely and the supply line can be drained using the drain valve integrated in the Connecting Point.*

### **Emptying the pipeline system DOWNSTREAM of the valve:**

*This requires that the Connecting Point be installed deeper in the ground than the Irrigation Valve.*

2. If the watering system is directly connected to the water tap, turn off the water supply and open the venting tap.
3. Set the selection lever ⑪ of all valves to the “ON” position.
4. If you are using the GARDENA Valve Box V3, make sure you open the integrated drain cap.

**Requirement:** The Drainage Valve must be installed deeper than or at the same depth as the Irrigation Valve.

→ Install a GARDENA Drainage Valve **Art. No. 2760** immediately after the valve.

The system is drained automatically via the the GARDENA Drainage Valve.

**→ If neither of these requirements is fulfilled, the valve must be removed and stored in a place safe from frost.**

### **Disposal:**

*(in accordance with  
Directive 2012/19/EU)*

The product must not be added to normal household waste. It must be disposed of in line with local environmental regulations.

→ Important: Make sure that the unit is disposed of via your municipal recycling collection centre.

## 7. Technical Data

<b>Solenoid Valve</b>	<b>9V (Art. No. 1251)</b>	<b>24V (Art. No. 1278)</b>
<b>Voltage</b>	9V DC	24V AC
<b>Operating pressure</b>	0.5 to 12 bar	0.5 to 12 bar
<b>Flow medium</b>	clean fresh water	clean fresh water
<b>Max. water temperature</b>	40 °C	40 °C

## 8. Service / Warranty

GARDENA guarantees this product for 2 years (from date of purchase). This guarantee covers all serious defects of the unit that can be proved to be material or manufacturing faults. Under warranty we will either replace the unit or repair it free of charge if the following conditions apply:

- The unit must have been handled properly and in keeping with the requirements of the operating instructions.
- Neither the purchaser or a non-authorized third party have attempted to repair the unit.

Faults with the Irrigation Valve caused by incorrectly installed batteries or leaking batteries in the Control Unit / Radio Receiver are not covered by the guarantee.

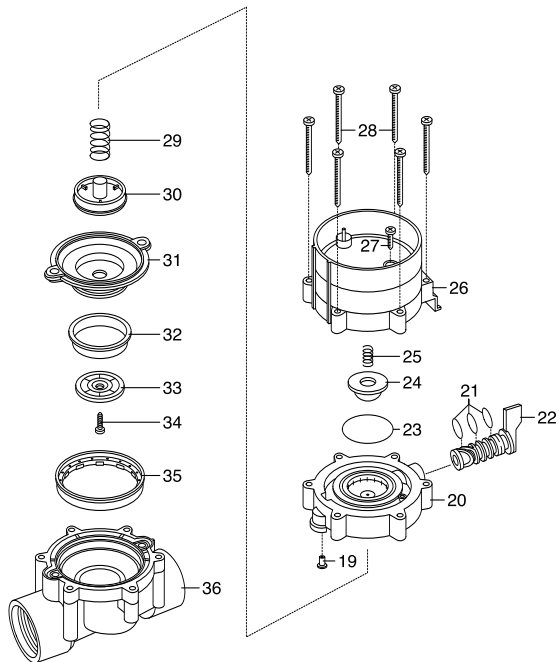

This manufacturer's guarantee does not affect the user's existing warranty claims against the dealer/seller.

If a fault occurs with your Irrigation Valve, please return the faulty unit together with a copy of the receipt and a description of the fault, with postage paid to one of the GARDENA Service Centres listed on the back of these operating instructions.

**D Produkthaftung**

Wir weisen ausdrücklich darauf hin, dass wir nach dem Produkthaftungsgesetz nicht für durch unsere Geräte hervorgerufene Schäden einzustehen haben, sofern diese durch unsachgemäße Reparatur verursacht oder bei einem Teileaustausch nicht unsere Original GARDENA Teile oder von uns freigegebene Teile verwendet werden und die Reparatur nicht vom GARDENA Service oder dem autorisierten Fachmann durchgeführt wird. Entsprechendes gilt für Ergänzungsteile und Zubehör.

**GB Product Liability**

We expressly point out that, in accordance with the product liability law, we are not liable for any damage caused by our units if it is due to improper repair or if parts exchanged are not original GARDENA parts or parts approved by us, and, if the repairs were not carried out by a GARDENA Service Centre or an authorised specialist. The same applies to spare parts and accessories.

**F Responsabilité**

Nous vous signalons expressément que GARDENA n'est pas responsable des dommages causés par ses appareils, dans la mesure où ces dommages seraient causés suite à une réparation non conforme, dans la mesure où, lors d'un échange de pièces, les pièces d'origine GARDENA n'auraient pas été utilisées, ou si la réparation n'a pas été effectuée par le Service Après-Vente GARDENA ou l'un des Centres SAV agréés GARDENA. Ceci est également valable pour tout ajout de pièces et d'accessoires autres que ceux préconisés par GARDENA.

**NL Productaansprakelijkheid**

Wij wijzen er nadrukkelijk op, dat wij op grond van de wet aansprakelijkheid voor producten niet aansprakelijk zijn voor schade ontstaan door onze apparaten, indien deze door onvakkundige reparatie veroorzaakt zijn, of er bij het uitwisselen van onderdelen geen gebruik gemaakt werd van onze originele GARDENA onderdelen of door ons vrijgegeven onderdelen en de reparatie niet door de GARDENA technische dienst of de bevoegde vakman uitgevoerd werd. Ditzelfde geldt voor extra-onderdelen en accessoires.

**S Produktansvar**

Tillverkaren är inte ansvarig för skada som orsakats av produkten om skadan beror på att produkten har reparerats felaktigt eller om, vid reparation eller utbyte, andra än Original GARDENA reservdelar har använts. Samma sak gäller för kompletteringsdelar och tillbehör.

**DK Produktansvar**

Vi gør udtrykkeligt opmærksom på at i henhold til produktansvarsloven er vi ikke ansvarlige for skader forårsaget af vores udstyr, hvis det skyldes uautoriserede reparationer eller hvis dele er skiftet ud og der ikke er anvendt originale GARDENA dele eller dele godkendt af os, eller hvis reparationerne ikke er udført af GARDENA-service eller en autoriseret fagmand. Det samme gælder for ekstra udstyr og tilbehør.
