Adherence to these operating instructions is a precondition for the correct use of the hedge trimmer.

Please note

WARNING ! Risk of injury !
The hedge trimmer must not be used for cutting lawns / lawn edges or for chopping up material for composting purposes.

2. Safety Instructions

If not used properly this product can be dangerous. The warnings and safety instructions must be followed to ensure reasonable safety and efficiency in using this product. The operator is responsible for following the warnings and instructions in this manual and on the product. Never use the product unless the guards provided by the manufacturer are in the correct position.

Explanation of Symbols on your product.

WARNING !

Read the user instructions carefully to make sure you understand all the controls and what they do.

Remove Battery before cleaning or maintenance.

Do not expose to rain. Do not leave the product outdoors while it is raining.

The use of eye and hearing protection is recommended.

General Power Tool Safety Warnings

WARNING ! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your mains operated (corded) power tool or battery-operated (cordless) power tool.

1) Work area safety

a) **Keep work area clean and well lit.**

Cluttered or dark areas invite accidents.

b) **Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust.** Power tools create sparks which may ignite the dust or fumes.

c) **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2) Electrical safety

a) **Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adaptor plugs with earthed (grounded) power tools.**

Unmodified plugs and matching outlets will reduce risk of electric shock.

b) **Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.

c) **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk electric shock.

d) **Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts.** Damaged or entangled cords increase the risk of electric shock.

e) **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.

f) **If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply.** Use of an RCD reduces the risk of electric shock.

3) Personal safety

a) **Stay alert, watch what you are doing and use common sense when operating a power tool.**

Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

b) **Use personal protective equipment. Always wear eye protection.** Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.

c) **Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool.** Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d) **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tools may result in personal injury.

e) **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.

f) **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.

g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of dust collection can reduce dust-related hazards.

4) Power tool use and care

a) **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.

b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that cannot be controlled with the switch is dangerous and must be repaired.

c) **Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) **Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.

e) **Maintain power tools.**

Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.

f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) **Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from those intended could result in a hazardous situation.

5. Battery tool use and care

a) Recharge only with the charger specified by the manufacturer. *A charger that is suitable for one type of battery pack may create a risk of fire when used with another battery pack.*

b) Use power tools only with specifically designated battery packs. *Use of any other battery packs may create a risk of injury and fire.*

c) When battery pack is not in use, keep it away from other metal objects, like paper clips, coins, keys, nails, screws or other small metal objects, that can make a connection from one terminal to another. *Shorting the battery terminals together may cause burns or a fire.*

d) Under abusive conditions, liquid may be ejected from the battery; avoid contact. If contact accidentally occurs, flush with water. If liquid contacts eyes, additionally seek medical help. *Liquid ejected from the battery may cause irritation or burns.*

6. Service

Have your power tool serviced by a qualified repair person using only identical replacement parts. *This will ensure that the safety of the power tool is maintained.*

Hedge trimmer safety warnings:

- **Keep all parts of the body away from the cutter blade. Do not remove cut material or hold material to be cut when blades are moving. Make sure the switch is off when clearing jammed material.** *A moment of inattention while operating the hedge trimmer may result in serious personal injury.*
- **Carry the hedge trimmer by the handle with the cutter blade stopped. When transporting or storing the hedge trimmer always fit the cutting device cover.** *Proper handling of the hedge trimmer will reduce possible personal injury from the cutter blades.*
- **Hold the power tool by insulated gripping surfaces only, because the cutter blade may contact hidden wiring.** *Cutter blades contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.*

Additional Safety Recommendations

Work area safety

Only use the product in the manner and for the functions described in these instructions.

The operator or user is responsible for accidents or hazards occurring to other people or their property. Pay special attention to the hazard for third parties posed by the increased working radius when the telescopic tube is extended.

Electrical safety

Use only on AC mains supply voltage shown on the product rating label.

Under no circumstances should an earth be connected to any part of the product.

Personal safety

Always wear suitable clothing, gloves, and stout shoes.

Thoroughly inspect the area where the product is to be used and remove all wires and other foreign objects.

All adjustments (turning the blade unit, inclining the blade head, altering the length of the telescopic tube) have to be made with the sheath in place, and the Hedge Trimmer must not rest on the blade in the process.

Before using the hedge trimmer, always make sure that the hand guard provided is fitted.

Before using the machine and after any impact, check for signs of wear or damage and repair as necessary.

Never attempt to use an incomplete product or one with an unauthorised modification.

Power tool use and care

Know how to stop the product quickly in an emergency.

Never hold the product by the guard.

Do not use the Hedge Trimmer if the protection equipment (hand protection, 2-hand safety switch, protection cover, quick blade-stop) are damaged.

Do not use ladders whilst operating the product.

Remove the battery:

- before leaving the product unattended for any period;
- before clearing a blockage;
- before checking, cleaning or working on the appliance;
- if you hit an object. Do not use your product until you are sure that the entire product is in a safe operating condition;
- if the product starts to vibrate abnormally. Check immediately. Excessive vibration can cause injury.
- before passing to another person.

Maintenance and storage

RISK OF INJURY !

Do not touch blades.

→ **When work is finished or interrupted, refit the protective blade cover.**

Keep all nuts, bolts and screws secure to be sure the hedge trimmer is in safe working condition.

Battery safety

FIRE RISK !

→ **Never charge the batteries near acids or easily inflammable materials.**

RISK OF EXPLOSION !

→ **Protect Cordless Hedge Trimmer from heat and fire. Do not leave on radiators or expose to strong sunshine for long periods.**

Do not use the battery charger outdoors.

→ **Protect the the battery charger from damp or wet areas.**

Only use your Hedge Trimmer in an ambient temperature between -10 °C and +45 °C.

The charging cable should be checked regularly for signs of damage or ageing (brittleness) and may only be used if it is in perfect condition.

The charger unit provided may only be used to charge the rechargeable batteries supplied with the Hedge Trimmer.

Non-rechargeable batteries must not be charged with this battery charger (danger of fire).

The Hedge Trimmer must not be operated during charging.

After charging, disconnect the charger from the mains. Only charge battery between 10 – 45 °C. After heavy duty service allow battery to cool down first.

Storage:

The trimmer must not be stored over 35 °C or under direct exposure to sunlight.

Do not store the Hedge Trimmer in places with static electricity.

3. Assembly

Fitting the hand guard:

Before the hand guard ⑤ can be fitted, the position of the hedge trimmer has to be changed – from the packing position **A** to the working position **C**.

A Hold down the button ① and tilt the swivel head ② by 90° (see 5. Operation “Tilting the swivel head”).

B Hold down the button ③ and rotate the cutting unit ④ to the 0° position (see 5. Operation “Rotating the cutting unit by 90°”).

C Hold down the button ① and tilt the swivel head ② to 0°.

→ Push the hand guard ⑤ onto the swivel head ② until the snap-on fittings engage.

4. Initial Operation

Charging the battery:

WARNING!
Overvoltage damages batteries and the battery charger.

→ Ensure the correct mains voltage.

Before using for the first time, the battery must be fully charged. Charging time (for uncharged battery) see 10. Technical Data.

The lithium-ion battery can be charged in any state of charge, and the charging process can be interrupted at any time without harming the battery (no memory effect).

In order that the fully charged battery does not self-discharge via the charger, it should be disconnected from the charger after charging.

1. Depress both locking buttons ⑥ and remove the battery ⑦ from the battery holder ⑧ on the handle.
2. Plug the plug of the charger cable ⑨ into the battery ⑦.
3. Plug battery charger ⑩ into a mains socket.

Charging indicator lamp ⑪ lights up red:
The battery is being charged.

Charging indicator lamp ⑪ lights up green:
The battery is fully charged.

(For charging time, see 10. Technical Data.)

4. First remove the charging cable ⑨ from the charging socket and then unplug the battery charger ⑩ from the mains socket.
5. Put the battery ⑦ on the battery holder ⑧ on the handle.

Avoid exhaustive discharge:

Do not wait until the blade comes to an absolute stop (battery totally discharged) as this shortens the battery life.

→ If the output of the hedge trimmer decreases noticeably, charge the battery.

If the battery has been totally discharged, the LED will flash at the start of charging. If the LED is still flashing after an hour, a fault has occurred (see 8. Troubleshooting).

5. Operation

Working positions:

The hedge trimmer can be operated in 4 working positions.

Side trimming:
Cutting unit rotated by 90°

Vertical trimming at high level:
Telescopic tube extended

Horizontal trimming at high level:
Cutting head tilted by 75°, telescopic tube extended

Trimming at low level:
Cutting head extended by -45°, telescopic tube extended

Rotate cutting unit through 90°:

For sideways cutting, the cutting unit can be rotated through 90°. The cutting unit (4) can be turned to the right or left for right-handed or left-handed users respectively.

1. Remove the battery from the handle (see 4. Initial Operation).
2. Keep button (3) pressed.
3. Turn cutting unit (4) 90° in the required direction until the button (3) locks into place.

→ Check the lock!

4. Put the battery on the handle (see 4. Initial Operation).

A safety device prevents the Hedge Trimmer from starting up when the button (3) is pressed or not locked in 0° or 90° position.

Tilting the swivel head:

For trimming at high and low level, the swivel head (2) can be tilted at an angle of 75° to -45° in 15° increments.

1. Remove the battery from the handle (see 4. Initial Operation).
2. Hold down the button (1).
3. Tilt the swivel head (2) in the direction wanted.
4. Release the button (1) and allow it to engage.
5. Put the battery on the handle (see 4. Initial Operation).

A safety device prevents the hedge trimmer from starting when the button is depressed or not engaged (1) or when the tilting angle exceeds -45° (packing position).

Extending the telescopic tube:

The telescopic tube (13) / (15) offers continuous extension for trimming at high and low level and can be extended in two stages to a total length of 62 cm.

1. Remove the battery from the handle (see 4. Initial Operation).
2. Open clamping lever (12), extend the lower telescopic tube (13) to the length required and close clamping lever (12) again.
3. Open clamping lever (14), extend the upper telescopic tube (15) to the length required and close clamping lever (14) again.
4. Put the battery on the handle (see 4. Initial Operation).

Starting the Hedge Trimmer:

DANGER! Risk of physical injury!

If the Hedge Trimmer does not switch off automatically, there is a risk of lacerations.

→ Never override the safety devices (e.g. by strapping down one of the start buttons).

Starting the Hedge Trimmer:

The hedge trimmer is fitted with a two-handed safety device (2 start buttons) to prevent the unit from being turned on by accident.

1. Put the battery on the handle (see 4. Initial Operation).
2. Remove the protective cover (16) from blade (17).

3. Hold the guide handle ⑱ with one hand and press the start button ⑲.
4. Hold the main handle ⑳ with the other hand and press the start button ㉑.
The hedge trimmer will start.

Switching the Hedge Trimmer off:

1. Release the start buttons ⑲ / ㉑.
2. Slide the protective cover ⑯ over the cutter blade ⑰.
3. Remove the battery from the handle (see 4. Initial Operation).

6. Storage

Storage:

The hedge trimmer must be stored out of the reach of children.

1. Remove battery (see 4. Initial Operation).
2. Clean the hedge trimmer (see 7. Maintenance) and slide the protective cover ⑯ over the cutter blade ⑰.
3. Store the hedge trimmer in a dry, frost free place.

Cleaning the Hedge Trimmer:

DANGER! Risk of physical injury!

Cutting injuries can be caused if the hedge trimmer does switch on unintentionally.

→ Before maintenance, remove the battery (see 4. Initial Operation) and slide the protective cover ⑯ over the cutter blade ⑰.

ATTENTION ! Damage to the hedge trimmer!
 → Never clean the hedge trimmer under running water or with a water jet (in particular a high pressure water jet).

1. Clean the hedge trimmer with a damp cloth.
2. Lubricate the trimmer blade ⑰ with a low viscosity oil (e.g. GARDENA spray-oil Art. 2366). Avoid contact of the oil with the plastic parts and wear gloves.
