Persons with reduced physical or mental abilities may use the product only if they are supervised or instructed by a responsible person. Children must be supervised to ensure that they do not play with the product. Never operate the product when you are tired, ill or under the influence of alcohol, drugs or medicine.

→ Please keep these operating instructions in a safe place.

**1. Area of application of your GARDENA Replacement Battery**

*Proper use as directed:*

The rechargeable battery is used as a power supply for the relevant GARDENA cordless appliances and is intended for use in private house and hobby gardens. The replacement battery must not be used in public facilities, parks, sports grounds, next to roads or in agriculture or forestry. Observance of the operating instructions provided by GARDENA is a prerequisite for correct use of the rechargeable battery.

*Use/responsibility:*

Attention! For risks of injury the battery must not be used as power source for other devices. Only use the battery for the GARDENA appliances intended.

Electrical safety:

#### FIRE RISK!

→ The battery to be charged must be placed on a non-flammable, heat resistant and non-conductive surface while charging. Keep corrosive, flammable and easily combustible objects clear of the battery charger and the battery. Do not cover the battery charger and the battery while charging. Unplug the battery charger immediately in the event of smoke formation or fire.

Only original GARDENA Charger Units may be used for charging. The use of other battery chargers may damage the batteries irreparably and even cause a fire.

Protect batteries from heat and fire. Do not leave on radiators or expose to strong sunshine for long periods.

Storage:

Do not store the battery above 45 °C or in direct sunlight. Ideally, the battery should be stored below 25 °C so that self-discharge is low. Never store while still attached to a tool, this prevents misuse and accidents.

Do not store the battery in places where static electricity is present.

Warning! This machine produces an electromagnetic field during operation. This field may under some circumstances interfere with active or passive medical implants. To reduce the risk of serious or fatal injury, we recommend persons with medical implants to consult their physician and the medical implant manufacturer before operating this machine.
