pumping them out, for drawing water from wells and shafts, for draining boats and yachts and for aerating and circulating water for limited periods and for pumping water containing chlorine and detergents in private domestic gardens and allotments.

#### Liquids to be pumped:

The GARDENA Submersible Pump must only be used to pump water.

The pump is fully submersible (water-tight encapsulation) and is submerged in water (for max. submersion depth see 7. TECHNICAL DATA).

The product is suitable for pumping the following liquids:

- **Clear Water Setting:** clean to slightly dirty water with a max. particle size of 5 mm.
- **Dirty Water Setting:** clean to very dirty water with a max. particle size of 35 mm.

The product is not intended for long term use (continuous circulation operation).

#### DANGER! Risk of physical injury!

→ The pump should not be used for the delivery of salt water, corrosive, easily inflammable or explosive liquids (e.g. petrol, paraffin, thinners), oil, heating oil or foodstuffs.

## 1. SAFETY

**Important!** Read the operator's manual carefully before use and keep for future reference.

#### Symbols on the product:

Read operator's manual.

#### General safety warnings

##### Electrical safety

#### DANGER! Electric shock!

Risk of injury due to electric shock.

- The product must be supplied through a residual current device (RCD) having a rated residual operating current not exceeding 30 mA.
- Contact GARDENA Service if the Residual Current Device (RCD) has triggered.

#### DANGER! Risk of injury!

Risk of injury due to electric current.

- Disconnect the product from the mains before you maintain or replace parts. Thereby the disconnected socket must be in the visual range.

#### Safe operating practices

The water temperature should not exceed 35 °C.

The pump must not be used when people are in the water.

Pollution of the liquid could occur due to leakage of lubricants.

Do not use below +3 °C ambient/media temperature.

Keep bystanders away from the water.

Operate the pump only with the elbow connector.

The hose end should be lower than the maximum delivery head.

#### Circuit breakers

##### Thermal protection switch:

In the event of an overload, the pump is switched off by the built-in thermal motor protection. After sufficient cooling of the motor, the pump is operational again.

#### Automatic venting

This pump is equipped with a vent valve which eliminates any air pockets in the pump. Depending on the function, a small amount of water can escape from the side of the housing.

#### Additional safety warnings

##### Electrical safety

#### DANGER! Cardiac arrest!

This product makes an electromagnetic field while it operates. This field may under some conditions interfere with active or passive medical implants. To decrease the risk of conditions that can possibly injure or kill, we recommend persons with medical implants to speak with their physician and the medical implant manufacturer before you operate the product.

The use of this product by young people under the age of 16 is not recommended.

#### Intended use:

The **GARDENA Submersible Pump** is intended for drainage purposes if flooding occurs but also for transferring water to and from tanks and

**Cables**

If extension cables are used, these must comply with the minimum cross-sections in the table below:

Voltage	Cable length	Cross section
230 – 240 V/50 Hz	Up to 20 m	1.5 mm <sup>2</sup>
230 – 240 V/50 Hz	20 – 50 m	2.5 mm <sup>2</sup>

**DANGER! Electric shock!**

**With a cut off mains plug, moisture can get into electrical parts via the mains cable and cause a short circuit.**

→ Never cut the mains plug off (e.g. to feed through wall).

→ Don't use the power cable for plugging off.

→ If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

Mains plug and extension connections must be protected from water splashes. Ensure that the electrical connections for plugs and sockets are made in areas safe from flooding.

Protect the mains plug and the mains power cable from heat, oil and sharp edges.

Observe the mains voltage. The information on the nameplate must be in agreement with the data for the mains power grid.

The pump's mains plug must be disconnected before anybody enters the swimming pool or touching the surface of the water.

The mains power cable must not be used for fastening or transporting the pump. For submerging or lifting/securing the pump, please use a fastening rope. Do not use the power cable to lift the pump.

Please regularly check the connecting line.

Before using, always subject the pump (especially the power cables and the power connections) to a visual inspection.

A pump which is damaged should not be used. In the event of damage, have the pump checked by GARDENA Service.

Assembly instructions: Retighten all screws by hand.

Before use after maintenance, make sure that all parts are screwed together.

When using our pumps with a generator, the warnings of the generator manufacturer must be observed.

**Personal safety****DANGER! Risk of suffocation!**

**Small parts can be easily swallowed. There is also a risk that the polybag can suffocate toddlers. Keep toddlers away when you assemble the product.**

Please be sure not to use the clear water function to pump dirty water. It can lead to blockage and overheating of the pump.

Observe the minimum water level in accordance with the characteristics given for the pump.

Allow the pump to run no longer than 10 minutes against a closed pressure side. Sand and other abrasive substances cause increased wear and reduce the pump's output.

The float switch may only be operated outside the water.

The hose must not be disconnected during operation.

Allow the pump to cool down before troubleshooting.

**Pump****Art. 9048**

**Small hose diameter** 25 mm (1")

**Art. GARDENA Hose Clamp** Art. 7193

**Medium hose diameter** GARDENA Connection System G 1"

**Art. GARDENA Hose Clamp** \* 32 mm (1 1/4") Art. 7194

**Large hose diameter** 38 mm (1 1/2")

**Art. GARDENA Hose Clamp** Art. 7195

When using the 38 mm (1 1/2") hose, we recommend the **GARDENA Flat Hose Set Art. 5005** with 10 m hose and hose clamp.

\* There is an additional connection nipple ④ for 1 1/4" hoses is supplied.

**To connect the hose via the connection nipple:**

1. When using the large diameter hose, cut off the connection nipple ④ at ②.
2. Push the hose onto the connection nipple ④.
3. Fix the hose to the connection nipple ④ e.g. with a GARDENA Hose Clamp.

**Connect hose via the GARDENA Connection System:**

19 mm (3/4")/15 mm (5/8") and 13 mm (1/2") hoses can be connected via the GARDENA Connection System.

We do not recommend hose diameters smaller than 25 mm (1"), otherwise there will be a significant reduction in the output of the delivery rate.

Hose diameter	Pump connection	
13 mm (1/2")	GARDENA Pump Connection Set	Art. 1750
15 mm (5/8")	GARDENA Pump Connection Set	Art. 1750
19 mm (3/4")	GARDENA Pump Connection Set	Art. 1752

1. Cut off the connection nipple ④ at ②.
2. Connect the hose to the connection nipple ④ via the appropriate GARDENA Connection System.

**To assemble the pump connection [Fig. A5]:****DANGER! Risk of physical injury!**

**Cut injury by the impeller.**

→ Operate the pump only with the elbow connector.

The hose can be easily connected and disconnected using the locking devices ② on the elbow connector ①.

1. Screw the elbow connector ① clockwise into the pump until it stops. (If the hose is to be installed horizontally, the elbow connector ① can be screwed out again up to half a turn.)
2. Screw the connection piece ③ into the connection nipple ④.
3. Push the connection nipple ④ of the hose into the elbow connector ① until it stops and it engages audibly and visibly.  
*The hose is securely connected to the pump.*

**2. ASSEMBLY****DANGER! Risk of physical injury!**

**Injury when the product starts accidentally.**

→ Disconnect the product from the mains before you assemble the product.

**3. OPERATION****DANGER! Risk of physical injury!**

**Injury when the product starts accidentally.**

→ Disconnect the product from the mains before you connect, adjust or transport the product.

**To remove the handle lock [Fig. A6]:**

The handle lock ⑤ must be removed before the product is used for the first time.

1. Pull the attached handle locks ⑤ outwards.
2. Keep them for later securing procedures (e.g. transport or storage).

**Connection possibilities of the connection nipple [Fig. A1]:**

The hose can be connected via the connection nipple ④ with different hose diameters or the GARDENA Connection System.

**Large hose diameter** Cut off nipple at ③ [Fig. A2]

**GARDENA Connection System** Cut off nipple at ⑤ [Fig. A3]

**Small hose diameter** Do not cut off nipple [Fig. A4]

When using the largest hose diameter, the pump has the maximum delivery capacity.

If the pump cannot be immersed via the handle, the pump must always be immersed via a rope ⑥ [Fig. O1].

Attach the rope ⑥ by tying it to the handle. The button ⑥ must not be depressed. Minimum immersion depth during initial operation see 7. TECHNICAL DATA.

Take care that the pump is located where the inlet openings at the suction base are not obstructed neither completely nor partly.

Stand the pump on a brick if using in a pond.

If the suction process is close to the minimum water level at start-up, the suction process may take longer.

1. Immerse the pump.
  2. Connect the pump to the mains.
- Attention! The pump can start immediately depending on the float switch setting.*

**Automatic mode with float switch [Fig. O2]:**

By adjusting the float switch ⑤ you have the possibility to determine the switching heights. For safe operation, the float switch must be able to move freely around the pump.

**To adjust the Cut-in and Cut-out Height [Fig. O2]:**

The maximum cut-in height and minimum cut-out height (see 7. TECHNICAL DATA) can be adjusted by pushing the float switch wire into the float switch lock.

- The higher the cable is clamped, the higher the cut-in and cut-out height.
- The shorter the length of cable between the float switch ⑤ and the float switch lock ④, the lower the cut-in height and the higher the cut-out height.

**Cut-in and cut-out heights in mm:**

	Without clamp		Upper clamp		Middle clamp		Lower clamp	
	Off	On	Off	On	Off	On	Off	On
Clear water	90	500	150	340	130	320	110	300
Dirty water	120	550	200	380	180	360	160	340

1. Push the cable of the float switch ⑥ into one of the openings of the float switch lock ④.
2. Check that the pump switches off automatically.

**CAUTION!**

In order to ensure that the float switch is able to switch on and off, the cable length between the float switch and the float switch lock must be at least 10 cm.

**Manual operation [Fig. O3]:**

The pump remains permanently in operation because the float switch is bypassed.

1. Slide the float switch ⑤ with the cable downwards onto the float switch locking device ④.
2. Place the pump on a firm surface.
3. Connect the pump to the mains.

*Attention! The pump begins operating immediately.*

The pump runs permanently without dry-running protection due to the bypassed float switch. To avoid damage due to dry running, only operate under supervision.

The minimum residual water depth (see 7. TECHNICAL DATA) is only achieved with the pedestal retracted in manual mode because the float switch already switches off the pump before this when in automatic mode.

**To change the function mode:**

The pump can be switched between clear water and dirty water. To do this, the pedestal is extended or retracted.

**To extend the pedestal (dirty water) [Fig. O4 – O7]:**

1. Take the pump out of the water [Fig. O4].
2. Lift up the pump and push the button ⑥ until the pedestal ⑦ is fully extended [Fig. O5].
3. If the pedestal does not extend completely, stand with your feet on the wings of the stand and pull the pump upwards [Fig. O6].
4. Release the button ⑥ again before you put the pump back down [Fig. O7].

The max. delivery rate is achieved with the pedestal extended.

The pedestal is correctly locked in position when the button is fully extended. If the button is not fully extended, repeat the process.

**To retract the pedestal (clear water) [Fig. O8 – O11]:**

1. Take the pump out of the water [Fig. O8].
2. Place the pump on a firm surface and push the button ⑥ [Fig. O9].
3. Push the pump down until the pedestal ⑦ is fully retracted and release the handle [Fig. O10].
4. To lock, push the pump down until the button ⑥ is fully extended again [Fig. O11].
5. When submerging the pump again, make sure that it is on a firm surface so that it cannot get stuck (e.g. foil).

The minimum residual water depth (see 7. TECHNICAL DATA) is only achieved with the pedestal retracted in manual mode.

For best possible suction, we recommend switching to clear water mode when the water level has reached the turquoise ring.

## 4. MAINTENANCE

**DANGER! Risk of physical injury!**

Injury when the product starts accidentally.

- Disconnect the product from the mains before you maintain the product.

**To clean the pump:****DANGER! Risk of physical injury!**

Risk of injury and risk of damage to the product.

- Do not clean the product with a water jet (in particular high-pressure water jet).
- Do not clean with chemicals including petrol or solvents. Some can destroy critical plastic parts.

- Clean the surface of the pump with a damp cloth.

**To flush the pump:**

After pumping water containing chlorine, detergents or heavily soiled water, the pump must be flushed.

1. Pump lukewarm water (max. 35 °C), possibly adding a mild cleaning agent (e.g. detergent) until the pumped water runs clear.
2. Flush the button if the water is very dirty.
3. Remove residuals according to the waste disposal laws applicable in your area.

**To clean the button [Fig. M1]:**

If the button gets stuck due to dirt, it can be cleaned.

1. Push in the two lockings ⑬.
2. Pull off the button ⑥.
3. Clean the button ⑥, the lockings ⑬ and the handle under running water.
4. Reassemble the button ⑥ in reverse order.

## 5. STORAGE

**To put into storage:**

**The pump is not frost-proof!**

**The product must be stored away from children.**

1. Disconnect the pump from the mains.
2. Turn the pump upside down until no more water runs out.
3. Clean the pump (see 4. MAINTENANCE).
4. Store the pump in a dry, enclosed and frost-free place.

**Disposal:**

(in accordance with RL2012/19/EC)

The product must not be disposed of to normal household waste. It must be disposed of in line with local environmental regulations.

**IMPORTANT!**

- Dispose of the product through or via your municipal recycling collection centre.

## 6. TROUBLESHOOTING

**DANGER! Risk of physical injury!**

Injury when the product starts accidentally.

- Disconnect the product from the mains before you troubleshoot the product.

**To clean the pedestal and the impeller [Fig. T1/T2]:**

If the pedestal cannot be changed according to the chapter 3. OPERATION To change the function mode, the pedestal must be cleaned.

1. Unscrew the 4 Phillips screws ⑧.
2. Pull the suction base ⑨ off the pump.
3. Unscrew the 4 Phillips screws ⑩.
4. Pull the pedestal ⑦ off the suction base ⑨.

5. Clean the pedestal ⑦, the suction base ⑨ and the impeller ⑪ (the warranty does not become void as a result of this maintenance work).
6. Clean the sealings ⑭ carefully to avoid damage and leakage.
7. Reassemble the pedestal ⑦ and the suction base ⑨ in reverse order. Make sure that the 4 springs ⑫ are fitted on the domes ⑯ of the pedestal ⑦.

#### A damaged seal must be replaced.

**For safety reasons a damaged impeller can only be exchanged by the GARDENA Service Centre.**

Problem	Possible Cause	Remedy
<b>Pump is running, but doesn't deliver water</b>	Air cannot escape, because the pressure line is closed. (Possible kink in the pressure hose.)	→ Open the pressure line (e.g. shut-off valve, delivery units).
	Air in suction foot.	→ Wait for about 3 minutes until the pump has vented; if necessary, turn off and then on again.
	Suction opening is clogged.	→ Clean the suction opening with a water jet.

	Impeller is blocked.	→ Clean the pedestal and the impeller.
	Water level below minimum water level when put into operation.	→ Submerge the pump deeper.
<b>Pump does not start or stops suddenly during operation</b>	Thermal switch has turned the pump off because of over-heating.	→ Clean the suction opening. Observe the max. media temperature (35 °C).
	Pumping without electricity.	→ Check fuses and electrical plug connections.
	RCD has triggered (residual current).	→ Disconnect the pump and contact the GARDENA Service.
<b>Pump is running but the delivery drops suddenly</b>	Suction opening is clogged.	→ Clean the suction opening with a water jet.
	The pump sucks to the ground (e.g. foil).	→ Place the pump on a suitable hard ground.
	Hose is clogged.	→ Remove the clog from the hose.
<b>Pedestal is not correctly locked in position. Pedestal is stuck</b>	Pedestal is dirty.	→ Clean the pedestal and the impeller.
<b>Button is stuck</b>	Button is dirty.	→ Clean the button.

**NOTE:** For any other malfunctions please contact the GARDENA service department. Repairs must only be done by GARDENA service departments or specialist dealers approved by GARDENA.
