

A woman is sitting in a white wicker chair on a green lawn, reading a book. She is wearing a patterned dress and has her legs crossed. In the foreground, a small, dark-colored robotic lawnmower with blue accents is on the grass. To the right, a man in a striped shirt is partially visible, looking towards the woman. In the background, there is a modern house with a balcony and lush greenery.

# Do what you love.

GARDENA robotic lawnmowers

[gardena.com](https://gardena.com)

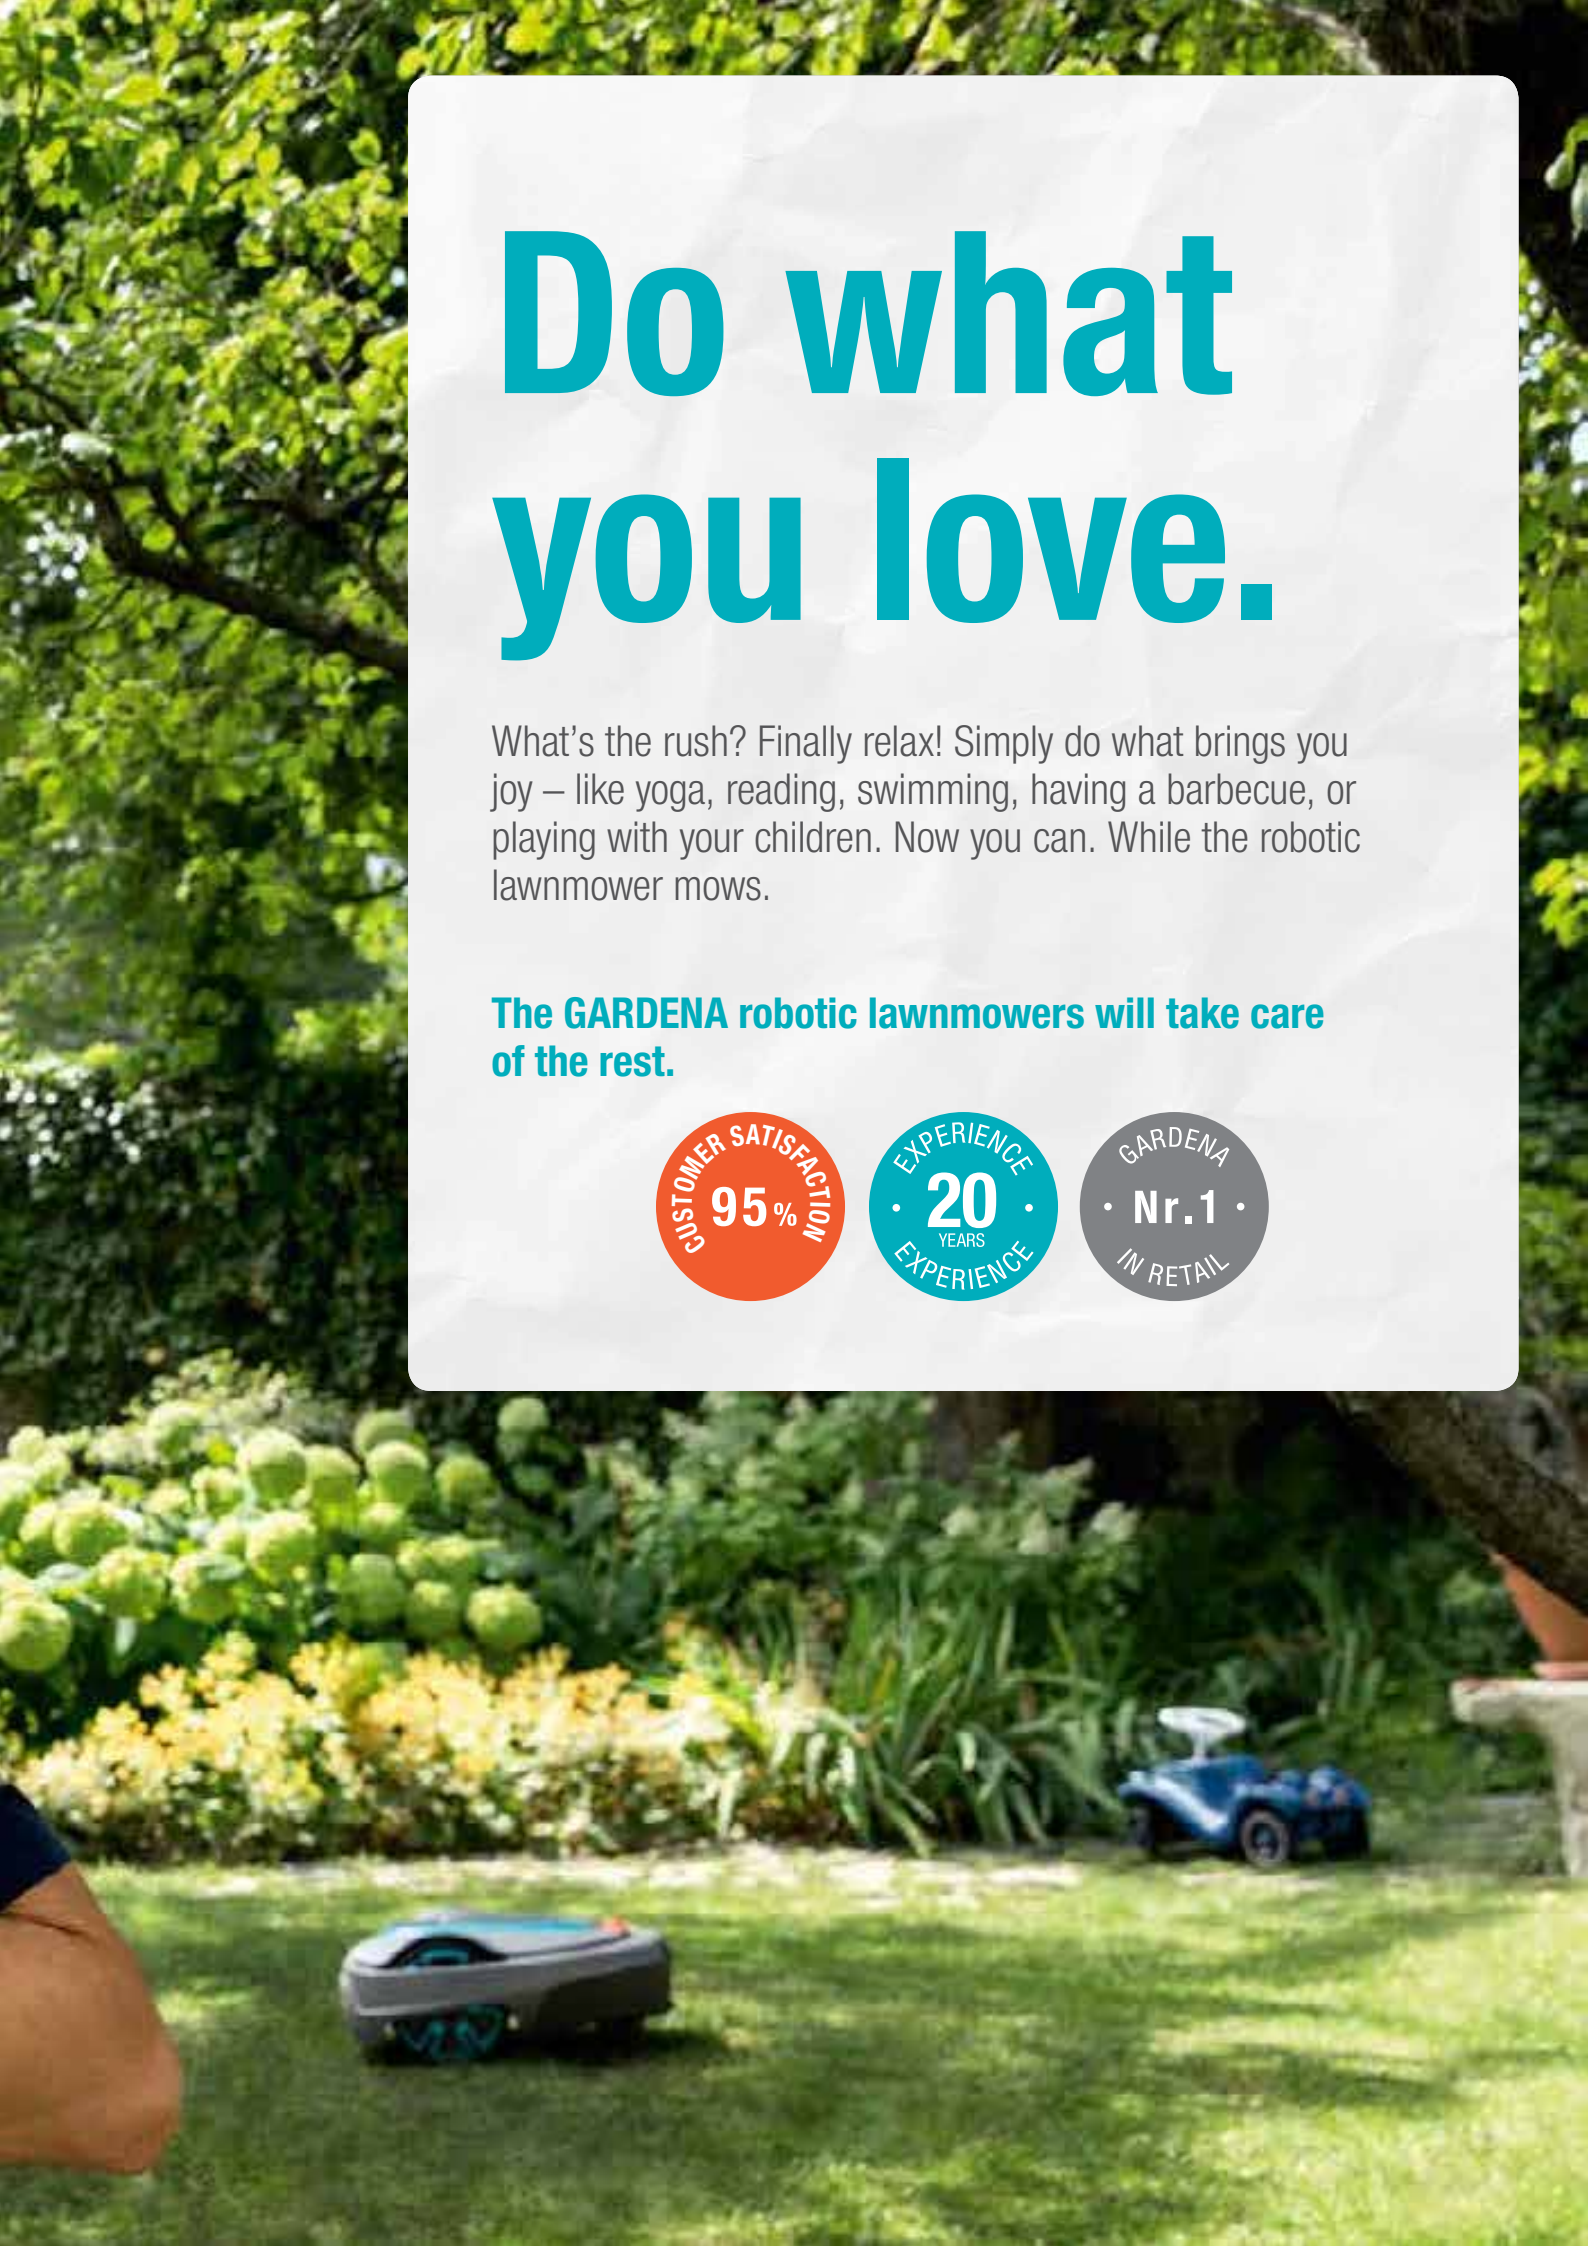

# Do what you love.

What's the rush? Finally relax! Simply do what brings you joy – like yoga, reading, swimming, having a barbecue, or playing with your children. Now you can. While the robotic lawnmower mows.

**The GARDENA robotic lawnmowers will take care of the rest.**

# Let go. The new SILENO city.

The latest generation of robotic lawnmowers for small gardens.

The SILENO city is now the unsung hero of beautiful lawns. It belongs to our new generation of robotic lawnmowers for small gardens. Because let's be honest: Even keeping smaller lawns tidy can take a lot of effort.

- **Can be controlled via smartphone**
- **Clean using the garden hose**
- **With set-up assistant**

# Mowing with the mowing masters.

The most important features of our robotic lawnmowers.

## INTUITIVE

Install, programme and operate in the blink of an eye. With simple menu navigation.

## QUIET

Quieter than nearly the rest – less than 60 db(A). So the neighbours will be pleased too.

## WORKS IN ALL WEATHERS

Mows in any weather.

## UNCOMPLICATED

Simply clean the SILENO city using your garden hose. And you are ready to go!

The most important features of our robotic lawnmowers.

### **AGILE**

Narrow areas? No problem.  
The robotic lawnmowers pass through corridors as narrow as 60 cm between the boundary wires.

### **INDEPENDENT**

Totally autonomous mowing and charging equals pure relaxation.

### **SAFE**

Proven technology provides reliable peace of mind:  
Thanks to the GARDENA boundary wire, the robotic lawnmower definitively knows where to mow – down to the exact millimetre.

- Precise
- Reliable
- Flexible

### CUSTOMISED

SILENO+ models also have the SensorControl function: This determines the grass growth and adjusts the mowing.

### EASY TO INSTALL

Installation is as easy as ABC and can be completed quickly, but what if you simply don't have the time to do it? All information about our installation service can be found on page 16 or online:

 *Installation films*  
[www.gardena.com/robotic-installation](http://www.gardena.com/robotic-installation)

### SPOTLESS THANKS TO THE SENSORCUT SYSTEM

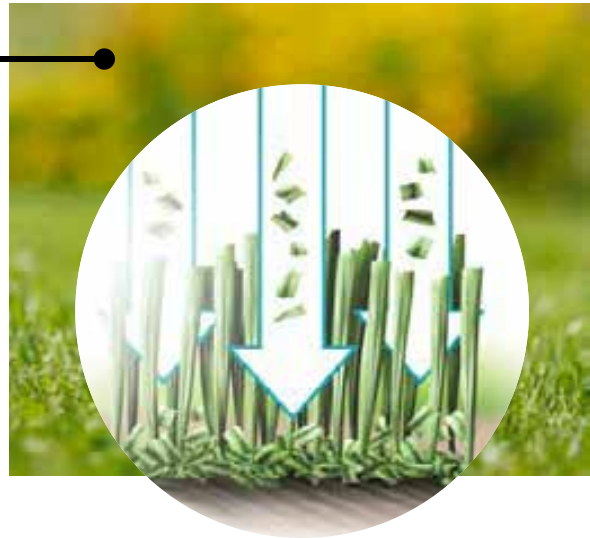

Perfect, stripe-free, close cut – because the polished precision blades on both sides cut grass evenly and cleanly from all directions.

The most important features of our robotic lawnmowers.

### **SUSTAINABLE**

With mulch function. Practical: The fine cut grass tips are a natural fertilizer and maintain the lawn right down to the root area.

### **FLEXIBLE**

How much should be cut? The cutting height can be adjusted flexibly.

### **GUIDING**

Thanks to guide cables reliably navigates all lawn areas, through narrow sections and back to the charging station.

# Support and service

How do you get a beautiful lawn and gain more time? With a robotic lawnmower. But which robotic lawnmower is the right one? What do I need to be aware of? Stay on the safe side with our service and warranty services.

Our service at a glance

---

## Frequently asked questions

Do you have a lot of questions? Find the answers in our online Robotic Lawnmower Support Centre.

---

## Planning service

### The right robotic lawnmower for any garden

We advise on the selection and help with the planning. Online advice can be found in the Robotic Lawnmower Support Centre or with our Robotic Lawnmower Service.

---

## Extended warranty

### Carefree mowing

With the GARDENA extended warranty you are fully covered, and you can choose from various service packages to find the one that suits you best.

---

## Installation service

### Install and let it mow

It is easy to install a GARDENA robotic lawnmower. If you don't have time to do it yourself, let a professional do the job for a flat fee.

---

## Installation films

### Here's how

Our installation films give you step-by-step instructions on how it's done.

## Instruction manuals

### Know more

Has the instruction manual disappeared? If you need more information, get answers to your questions in the Robotic Lawnmower Support Centre.

---

## Winter service

### The wellness program for the robotic lawnmower

Even a robotic lawnmower needs a break: With the professional Comfort or Premium Winter Service, including storage, the robotic lawnmower starts again in full working order in the spring.

---

## Spring check

### Get the robotic lawnmower ready for the new mowing season

Prepare the robotic lawnmower for the new season after its “winter sleep”: Discover a guide to the spring check here.

# Always connected to the garden. With your heart and your smartphone.

It goes without saying that there is also a smart model available for the GARDENA robotic lawnmowers for all garden sizes – this is the ideal entry into the forward-thinking smart system. With the GARDENA smart system and corresponding smart app, you will always be up-to-date with what's going on in your garden. And you can be sure that your garden and plants are always given the care they need automatically. The "green home" is available anytime, anywhere.

## Ready to go

With the GARDENA smart system and corresponding smart app, everything is much easier. The garden and the plants are automatically cared for perfectly, even if no one is at home. One look at your smartphone is enough to get you close to the "green home". And should it be necessary, a touch of your finger is enough and everything runs according to your wishes.

## My Garden

Always be connected with your garden from near and far via the app. Intervention possible at any time. Garden care can be so easy.

## Scheduling

Programme days of the week and times, edit schedules, create overviews, set priorities... For example, should a break be set for the robotic lawnmower if the sprinkler system starts? Everything can be controlled via smartphone.
